

A GENETIC DIAGNOSIS MAY HELP YOU TAKE ACTION NOW AND PLAN FOR YOUR PATIENT'S FUTURE

The only way to know if your pediatric patient's auditory neuropathy spectrum disorder (ANSD) has a genetic cause is to perform a genetic test

IDENTIFY

if the cause is genetic, via testing

FIND

the right specialist

DETERMINE

the appropriate management path

Did you know that more than half of pediatric hearing loss cases can be attributed to genetics¹?

Find answers with Amplify™, a sponsored, no-charge genetic test that screens children with sensorineural hearing loss for genetic causes

Easy ordering

Results in 18 days on average

Simple specimen collection

Genetic Counselors are available at no cost for providers and patients

PROGRAM ELIGIBILITY

The program is available to patients under 18 years of age with a medical history consistent with auditory neuropathy diagnosis.

PROGRAM DETAILS

While third parties and commercial organizations may provide financial support for this program, tests and services are performed by Prevention Genetics. Healthcare professionals must confirm that patients meet certain criteria to use the program. Third parties and commercial organizations may receive de-identified patient data from this program, but at no time would they receive patient-identifiable information. Third parties and commercial organizations may receive contact information for healthcare professionals who use this program. Genetic testing is available in the US. Healthcare professionals and patients who participate in this program have no obligation to recommend, purchase, order, prescribe, promote, administer, use, or support any other products or services from Invitae or from third parties or commercial organizations.
